

YES, I'M GETTING MARRIED, BUT WITH VARIATION

“Success with system”: Breuning presents its wedding bands ‘Variation’ and ‘Smartline’, two collections of excellence with various price categories that reward diversity, technical innovation, and style (as well as the system boxes) of the historic house of Pforzheim. Surprisingly Breuning harmonizes its wedding bands with complete parures in a beautiful ensemble.

Love is a good excuse to choose a wedding band by Breuning, the German quality for American betrothed couples. Patric Gettmann, sales manager, says that the two new collections, now presented in the USA, represent the most advanced design by Breuning, which is very attentive to detail and unusual for the most modern couples, essential and sumptuous for the most traditional ones. Breuning makes all people love.

Wedding System Breuning is the true winner of today’s challenge, starting from the artistic design of wedding bands throughout their high-tech execution, to the final packaging and customer service. A project aiming at perfection.

FROM BREUNING WITH LOVE

Breuning is present in over 30 international trade fairs. It has been developing skills and design in the goldsmith’s art for over 80 years and boasts 35 designers and pattern makers (with an amount of models that is now over 2 thousand pieces). Breuning works in a very professional way since the beginning of the design cycle. And that’s not all. In fact, its delivery system is perfect, performed with competence and punctuality. Retailers feel at their own home with Breuning, a company everyone should marry.
